

SPLIT ROLLER BEARING

EASE OF INSTALLATION AND MAINTENANCE

With a split housing design, these bearings can be quickly and easily installed or removed from a shaft ***without the need for disassembly of the entire assembly.*** This makes maintenance and repairs much simpler and faster, reducing downtime and increasing efficiency. Additionally, split roller bearings are highly durable and can withstand heavy loads and extreme temperatures, making them suitable for use in a wide range of industrial settings. They also have a longer lifespan than traditional bearings, further increasing their value and cost-effectiveness. Overall, the benefits of using split roller bearings make them an excellent choice for any industrial application that requires high performance, durability, and ease of maintenance.

- EASE OF INSTALLATION & MAINTENANCE
- SELF ALIGNING
- DRAIN PLUGS
- TRIPLE LABYRINTH SEALS
- THREE DUTY GROUPS
- CUSTOM WORK AVAILABLE
